# HOW WE BEGAN

## The Hitt Family

Dear Customer,

The following letter was written several years ago and presented to Harold Hitt, President, by his father at an awards banquet. We felt it was worth sharing and believe it will provide you with some insight into how National Stencil began.

In keeping with the all American dream, for sometime our son Harold, together with his wife Heidi, had been looking for a business they could establish where they would "be their own boss." In 1987 they came to my wife Dottie and me, with a proposal. It wasn't a proposal to borrow money from us to start their dream business. What Harold proposed was a true partnership where he and Heidi would match our investment and we would start a Rubber Stamp Business." He suggested that this business be started in my garage using some old outdated equipment donated to the cause by Heidi's mother, who owns and operates a rubber stamp business in Hemet, CA.

The plan was that Dottie would make the stamps. Harold and Heidi would function primarily in sales. We agreed to the plan and the family business, "HITT MARKING DEVICES, INC." was begun. The company grew quickly and it wasn't long before Harold, Heidi and Ken had to quit their jobs, and come into the business full time to assist Dottie in manufacturing and sales. Harold and Ken made sales calls and deliveries in the morning, then rushed back to help Heidi and Dottie manufacture, invoice and ship out the daily orders. Also as a result of the company's rapid growth, it wasn't long before they were bumping into each other in our garage. Harold began looking for a more suitable location, in the Orange County area. In addition to the fact they needed more space, Harold confessed to being embarrassed to tell his customers that he was operating out of "a garage."

We truly stepped out on faith, but hedged that faith at Harold's direction, by moving into the same general area where several large national and international corporations had established their home offices. New product lines were added such as, specialty inks, stone stamp pads, fingerprint pads, engraving, plaques and awards, Oilboard, Mylar, Brass, Magnetic and Rubber STENCILS, labels, electric time recorders, electric branding machines, etc. It truly became a marking device business, instead of merely a rubber stamp business.

We were recently awarded HEAVY WEIGHT SUPPLIER OF THE YEAR by Marking Industry Magazine. Harold has made it clear that he isn't going to be satisfied with being just another marking device company. He wants to be the best and the biggest. He is committed to offering the best in service, together with a quality product which is competitively priced. We are not the biggest yet but we are the best, thanks mostly to Harold and the dream that he held onto and sacrificed to achieve.

Also, thanks to Harold's philosophy of providing both quality and good service, and the efforts of our youngest son Ken, our company, Hitt Marking Devices was awarded Nordstrom Department store's "SUPPLIER OF THE YEAR" award. Since Nordstrom is considered to be a leader in both quality and service, this was no small accomplishment. We are grateful to Ken for making it happen. Ken, who entered the business in late 1988, has become an invaluable member of Hitt Marking Devices family team, as demonstrated by this award.

One of Harold's stated goals from the very beginning has been to provide a source of income for his dad and mom's retirement. That goal has now been achieved much earlier than we ever dreamed it could.

This award given this 14th day of December, 1993, by his proud parents, Don and Dottie Hitt.

From top left: Ken Hitt, wife Sue and at bottom left their daughter Lisa. Top right company co-founders Harold Hitt, wife Heidi and their daughters Brittany and Brooke.

Don and Dorothy Hitt, Co-Founders (Retired)

In the years since this letter was written, two new company divisions "National Stencil Products" and "I.D. Technologies" were formed to focus entirely on the manufacturing and selling of Custom Cut Stencils and Stencil related products, Identification, Fingerprinting and Forensic products. Don and Dottie have retired to Washington State. Heidi is a stay at home mom with two children. Harold, President and Ken, Vice President still remains involved in day to day operations.

"If you're in the area we invite you to come by and see us."

# RUBBER SAND BLAST STENCILS

HITT rubber masks are molded from natural or synthetic rubber. The masks are relieved with stencil style lettering along with special designs or trademark logos. Ideal for identification marking of tempered or laminated glass. Within seconds your mark is permanently etched into glass, metal or plastic. Marvel rubber masks are very durable for long life, keeping the cost per etch extremely low. Our standard mask size is 3" x 2" or 2-1/2" x 2-1/2". We can produce other mask sizes to your specifications. Lettering height starts at .060 and up. Rubber masks can be used to mark various shapes such as flat, curved, tubular, convex or concave. Please call or email us for more information and samples.

# STEN C LABL

## INTRODUCING STEN C LABL *The Marking Problem Solver.*

The systems' "Feather Touch" enables you to make up to 50 clean, sharp impressions in just one minute on virtually any surface, even glass.

Over 100 impressions can be made from each low-cost stencil. Stencils are available in a variety of sizes and configurations to meet your specific needs. The basic Sten C Labl is a hand-applied multiple marker composed of three basic units.

### **Sten C Labl can be used for:**

- Carton Addressing
- Content Information
- Part Marking
- Caution Notification
- Product Identification
- Anything you need to mark

### **The Stencil**

Stencils are available in a variety of Sizes and Types. They can be ordered plain or customized with your company's name, logo, or any other repeating information.

### **The Durahead**

This simple, yet ingenious two-part applicator tool holds the stencil, stores and supplies the ink, and marks the package or product. The applicator consists of the Durahead (a flat, durable ink pad framed in tough delrin plastic) and a screw-on, four ounce ink container. The refillable container becomes both handle and ink reservoir. There is also a curved (or rocker) applicator for heavy duty use. This applicator has its own ink reservoir and screw-on, custom molded handle.

### **The Ink**

Ink is available in FAST DRY and STANDARD DRY. The FAST DRY is used primarily on nonporous surfaces such as plastic, metal, glass, rubber, or any nonporous surface. Ink is mil-spec certified for the aerospace industry. STANDARD DRY is used on surfaces such as wood, cartons, paper, labels, and other surfaces that dry by absorption.

# LOGO/ARTWORK STENCILS

The cost will vary with logo size and complexity. A simple logo will have a set up cost of approximately \$50 plus the cost of the stencil. A complex graphic or large logo will have a higher cost.

To get an exact price quote, simply email us your logo (in either .gif, jpg, .doc, or pdf format) as well as the overall dimensions of your logo. We will provide you with a price quote within 1 business day.

## STENCIL CUTTING MACHINES

*Stencil Cutting Machines*

**Stencil Cutting Machines** are available in 6 character sizes, including 1/8", 1/4", 1/2", 3/4", 1" and 2". All Universal stencil cutters are built to U.S. Government specifications GG-S-747. These rotary magazine stencil cutters are designed for use with standard oilboard materials. For best results use .007" oilboard with the 1/8" machine and .010" or .015" oilboard with 1/4" and larger machines.

*SCM-5E Electronic Stencil Cutting Machines*

**SCM-5E Electronic Stencil Cutting Machines** will cut character sizes from 1/4" tall and up. The Stencil CAD software supplied contains a standard stencil character font with both upper and lower case letters. Logo and symbol vector files can be imported and merged with text characters.

**The SCM-5E Electronic Stencil Cutters** will cut vinyl, mylar and 0.015" oilboard. The Ultra-Cut Vinyl material has a repositionable adhesive backing which is ideal for use in stenciling on pipes and other cylindrical parts. This cutter will handle stencil media in sheet or roll form up to 29" wide.

StencilCAD software will run on PC's with Windows98 or later operating systems.

# FOUNTAIN ROLLERS

The pump action of Marsh Fountain Roller gives you fast, uniform ink dispensing without fading or flooding.

Fountain Roller: Use FR100 in 1-1/2" (3.8 cm) and 3" (7.6 cm) sizes on porous surfaces only with Marsh K ink.

### Features

- Durable aluminum and brass construction for tough environments. Long wearing neoprene roller. Environmentally friendly - refill from Marsh quart or gallon ink cans and reduce packaging waste.
- Replacement rollers available.

# STENCIL ROLLERS & APPLICATORS

## Rol-It-On® System Stencil Applicators For All Surfaces

Our most economical stencil applicators system for marking on both porous and non-porous surfaces. Use the refillable Rol-It-On ink pad to ink the roller prior to stenciling.

- For porous surfaces use a latex roller and R ink or use a Type N Roller with SK-1 ink
- For non-porous surfaces order a neoprene Type N roller and S or GS ink.
- Use the GS Kit to meet U.S. Government specifications when stenciling on porous or non-porous surfaces.

# VALVE ACTION MARKERS

Our markers are used in all sorts of industries, including paper and wood, automotive, warehousing, carpet, steel, electrical, chemical, pipe, baking, and meat packing. Valve-action markers deliver a measured supply of ink to the tip for consistent, permanent marks. Capillary-action felt-tip markers produce permanent, waterproof marks for general applications quickly and conveniently. Here are our most popular markers.

## GP-X MARKERS

- Makes a bold, opaque, permanent mark on almost any surface, including metal, wood, plastic, and glass.
- This valve action marker uses a fast-drying, permanent ink that won't chip. Weather and fade resistant. 10 ml capacity.
- Available in black, white, yellow, red, blue, green, orange, and silver.
