TRACING LOGO SERVICE

Vector files (dots connected) are the most used on graphic and printing industries due the high quality that those formats offer at the time of working with your logo on any type of project for any size, even larger than usual, allowing to keep the same high quality.

Stencils, stamps, prints and most of our products needs to be created using vector files. If you are unable to provide us your logo as a vector file in Corel Draw or Adobe Illustrator, our new service bring you the option of tracing your logo to obtain the best quality on your orders.

Our conversion process from raster to vector will give you the opportunity of keeping a high quality version of your logo to be used on any project.
